EDUCATION

Parul University

Computer Science & Engineering B.Tech

CGPA: 8.68

Vadodara, Gujarat

September 2022 - Present

SKILLS

Programming Languages: Java, Python, JavaScript, C, HTML/CSS
Systems/Networking: Linux, TCP/IP, Computer Networks
Libraries/Frameworks: Node.js, Express.js, React, Flask, Springboot
Tools / Platforms: Git, Postman, Docker
Databases: MySQL, PostgreSQL, MongoDB, Redis

EXPERIENCE

Future Interns

Remote

Internship in Full Stack Development

June 11, 2025 – Present

- Developed a personal professional portfolio website showcasing skills, projects, and achievements with interactive resume, contact form, and SEO optimization.
- Built a mini e-commerce storefront featuring product listings, shopping cart, and checkout simulation with form validation and optional user login.
- Rebranded a famous brand's website using AI-powered tools, integrating modern UI/UX, AI-generated branding elements, and mobile optimization.
- Tech Stack: React.js, Node.js, Express.js, Next.js, Tailwind CSS, MongoDB, MySQL, Firebase.

PROJECTS / OPEN-SOURCE

PromptShell – Social Summer of Code 2025 | [Link](#)

Python, CLI Tools, Open Source

- Contributed to PromptShell, an open-source terminal assistant designed for non-technical users, under Social Summer of Code 2025.
- Enhanced the `import_aliases` function in `alias_manager.py` to handle edge cases like invalid file paths and malformed JSON.
- Resolved Issue #36: Prevented crashes during alias import and introduced clear error messages for better user experience.

Alumni Association Platform | [Link](#)

JavaScript, Node.js, MongoDB, React, HTML5, CSS3

- Developed a web platform enabling alumni, students, and administrators to connect and collaborate via dedicated user portals.
- Integrated job and internship listing modules for alumni to support current students' career development.
- Implemented event management tools for organizing reunions and scheduling event reminders.
- Secured student registration and login system with backend verification to ensure data authenticity.

Real Estate Listing | [Link](#)

React, Node.js, MongoDB, HTML5, CSS3

- Built a user-friendly real estate platform using the MERN stack, enabling users to browse, buy, sell, and rent properties seamlessly.
- Implemented advanced filtering features for location, price, property type, and amenities to enhance user experience
- Integrated dynamic property listings with images, descriptions, and contact details for comprehensive property insights.

Bus Finder | [Link](#)

HTML5, CSS3, Node.js, MongoDB, React

- Contributed to the development of the official university transport website to help **7000+ students** locate campus buses in real time, in collaboration with the transport department.

- Assisted in implementing authentication using JWT and cookies, and contributed to front-end styling with CSS for a seamless and secure user experience.

CERTIFICATIONS

- Java - **HackerRank**
- Software Engineer Intern - **HackerRank**
- Computer Networks and Internet Protocol - **NPTEL**
- Database and SQL - **Infosys**
- Theory Of Computation - **NPTEL**

HONORS & AWARDS

- Selected Contributor – Social Summer of Code 2025 (Open Source Program)
- Smart India Hackathon Institute Level
- Finalist in the Coding Event at Projections – Gujarat's Largest Tech Fest
- Coding Competitions
